

"SYSPRO has enabled us to reduce our quoting time by around 70%. It provides visibility of imported goods while facilitating the control of associated costs. We can now cost independent designs quickly and accurately – with the confidence that our costings are correct. We can also pass significant discounts to our customers that previously we weren't sure we could afford."

Mark Bunt, General Manager, Epicentre Trading

"SYSPRO's real strength lies in its flexibility in manufacturing and distribution. SYSPRO has the advantage of offering a complete package so there isn't the need to go to third parties for solutions such as EDI or barcoding."

Chris Fissedden, Finance Manager, TT Steel Centre Australia

"The ability to look at various parts of the manufacturing process in more detail is much easier with SYSPRO. This has resulted in us becoming much more efficient. If there is a problem with a manufacturing process we identify it quickly and fix it immediately."

Phil Bradshaw, Managing Director, Barratt Communications

"Life would be much harder running an efficient modern manufacturing company without SYSPRO."

Michael Sachs, IT Director, Peter Sachs Industries Pty Ltd

"SYSPRO is a flexible, accurate, efficient modular manufacturing system for our Bill of Materials, inventory and all the necessary interlocking pieces of information in accounting and retailing"

Rob Woodroffe, Corporate Services Manager, Perfect Potion

Company Overview

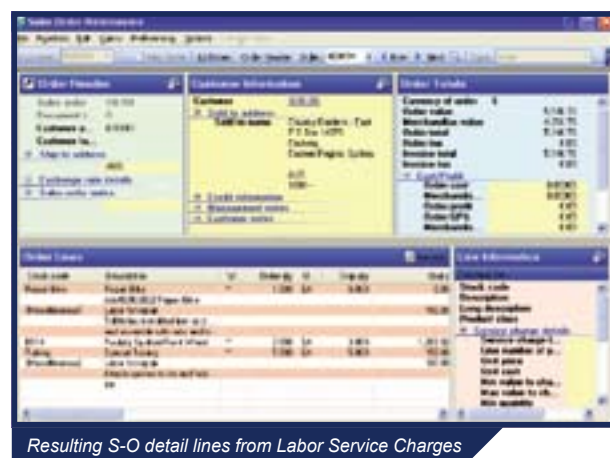

SYSPRO is a state-of-the-art integrated manufacturing, distribution and financial management system. Developed over 28 years and used by +12,000 licensed companies in 60 countries worldwide, SYSPRO is distributed in the Asia Pacific region across Australia, New Zealand, Indonesia, Malaysia, Papua New Guinea, Philippines, Singapore, Thailand, China and Hong Kong.

SYSPRO is one of the world's most widely installed enterprise resource planning (ERP) applications. It is available in multiple languages, including simplified Chinese and supports multiple currencies.

SYSPRO provides control and planning tools for the entire production and distribution process. It has extensive facilities for managing the supply chain, end-to-end, thereby helping businesses respond to the challenges of an increasingly competitive world.

SYSPRO ERP is one member of the SYSPRO family of products, which includes contact management (CM), factory scheduler (FS), warehouse management (WMS) and business intelligence tools. All of these are supported by integrated e-business facilities. The modular nature of SYSPRO allows your company to select those functions needed to increase operational control and effectiveness.

Underlying SYSPRO are leading edge technologies. SYSPRO's e.net solutions allows its functionality to be deployed to a far wider audience across a variety of computing and communications devices. Using these technologies greatly simplifies and streamlines the process of integrating the core manufacturing, distribution and financial system with other applications.

Manufacturing

SYSPRO's outstanding flexibility accommodates an extensive range of production methods – enabling manufacturing and distribution companies to efficiently plan, manage and forecast their business operations in an increasingly dynamic and competitive marketplace.

SYSPRO addresses all aspects of the manufacturing and production process—synchronising a variety of manufacturing techniques within one fully integrated ERP software system.

SYSPRO Manufacturing manages production across separate locations and multiple modes of manufacturing.

SYSPRO addresses all aspects of the manufacturing process and accommodates a wide range of production methods, including discrete, batch process and custom manufactures. SYSPRO supports both short and long production runs in the following manufacturing environments:

- Make-to-Order
- Job Shops
- Make-to-Stock
- Configure-to-Order
- Assemble-to-Order
- Engineer-to-Order
- Batch Process

SYSPRO offers features for estimating, master scheduling, finite capacity scheduling, labour performance, costing, lot and serial tracking, purchasing/receiving, backflushing, material verification, capacity and material requirements planning (MRP). SYSPRO Manufacturing integrates seamlessly with SYSPRO Financials and Distribution.

Distribution

SYSPRO's ERP solutions provide the technology to manage a supply chain from end to end. With manufacturing demanding swift assembly and distribution, SYSPRO'S highly developed distribution modules are ideally suited to single and multi-site domestic and international operations, for whom operational efficiency is fundamental to success.

SYSPRO provides manufacturing and distribution companies with a powerful, cost-effective, enterprise-wide business solution; affording businesses maximum control and flexibility over operations and inventory. As SYSPRO is a real time system, all information regarding purchase and sales orders, credit limits and inventory status, is always up to date.

SYSPRO Distribution allows tracking of items from the source to their current location and to identify all cost elements associated with the movement of goods.

The software provides tracking by serial or lot number, contract management, cross-reference labelling, and returned merchandise authorisation. This solution can be used across single and multi-site operations, single and multi-warehouse and multi-bin sourcing.

It offers an automated shipping system that facilitates the ability to consolidate orders on one invoice or multiple deliveries on one order or across multiple orders.

SYSPRO Distribution integrates seamlessly with SYSPRO Financials and Manufacturing.

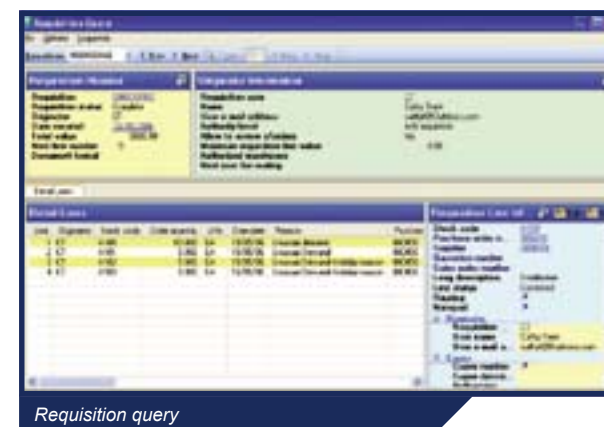

Finance & Accounting

SYSPRO's ERP solutions are particularly well suited to streamlining the accounting and finance procedures in any size organisation.

SYSPRO's accounting modules provide comprehensive financial and cost accounting functionality and control. SYSPRO Analytics allows for multi-dimensional information analysis, with numerous built-in KPIs and ability to define additional metrics.

SYSPRO financials enables users to manage and control operational constraints at the individual level, while providing group information for budgeting, turnover and profitability assessment.

The fully-integrated ERP system allows transaction processing in the current year and two prior periods. A highly flexible, built-in Financial Report Writer caters

Requisition query

for single entities as well as multi-divisional reporting and comparative analysis and additional to normal printable reports. General Ledger financial reports can now be published in XML using the XBRL (Extensible Business Reporting Language) standard.

These reports can then be viewed on the web or an intranet with hyperlinks enabling drill-down functionality into the General Ledger codes and source documents. Output can also be viewed in the SYSPRO browser, enabling further drill down from transactions to the original source documents in the sub-ledger.

SYSPRO Financials is integrated with SYSPRO Distribution and SYSPRO Manufacturing - one of the few completely integrated product offerings on the market.

Our Customers

SYSPRO is highly adaptable to a range of industries. Companies can choose from over 45 integrated business modules to build a scalable and customised solution. SYSPRO's clients in manufacturing and distribution range from small businesses to well-known public companies in industries such as:

- Engineering
- Food & Beverage
- Pharmaceuticals
- Medical Devices
- Industrial and Commercial Machinery
- Plastics and Rubber
- Fabricated Metals
- Automotive Parts and Components
- Furniture
- Chemicals and Fertilizers
- Computers and Electronics
- Building & Construction
- Consumer Products
- Specialist Vehicles

Price/Performance

SYSPRO's integrated software solution is renowned for outstanding price/performance.

Software is priced according to business modules and number of users with an annual maintenance fee covering product upgrades. This dramatically reduces the initial cost of acquiring the software, reduces total cost of ownership and ensures customers continuously receive product upgrades and support over the life of the software.
